Phys 201: Physics Toolbox

**Physics & Astronomy**

This course is an introduction to problem solving in physics. The physical meaning of the mathematical concepts students encounter in introductory calculus-based physics courses is discussed, and the corresponding analytical methods applied to problems on the kinematics and dynamics of particles in three dimensions, work and energy, and other physics topics.

1 Credit

**Instruction Type(s)**
- Recit/Discus: Recitation/Discussion for Phys 201

**Subject Areas**
- Physics, General

**Related Areas**
- Acoustics
- Atomic/Molecular Physics
- Condensed Matter and Materials Physics
- Elementary Particle Physics
- Nuclear Physics
- Optics/Optical Sciences
- Physics, Other
- Theoretical and Mathematical Physics
