As appropriate, additional courses and advanced/special legal topics focusing on air and space law may be included in this category on a case-by-case basis upon approval by the designated faculty member and/or senior associate dean.

- Successful completion of 3 intensive credit hours.

Intensive Credit Hours

1. Individual study in air or space law that is approved in advance.
2. An externship/internship placement approved in advance and related to air or space law.

Other Academic Requirements

The student must have at least a 3.0 grade-point average in credits applied to the concentration credit-hour requirements. Excess hours, that is, credit hours earned in the subject area but not needed to complete the concentration, may be excluded from the calculation of the concentration GPA.
